EDUCATION

ISPTEC
B.Sc. Petroleum Engineering
2022 – Present · 3rd Year
CEPI
Secondary School Diploma
2020 – 2022

LANGUAGES

Portuguese Native
English TOEFL 99

TECHNICAL SKILLS

- Python – Pandas, Matplotlib
- Z-Factor Calc. (Pitzer, Papay)
- EOR Method Selection
- Reservoir & Well Eng.
- Offshore Drilling Fluids
- GIS · Blender 3-D
- C, HTML / CSS

LEADERSHIP

- Membership Chairperson
- Event Management
- Technical Communication
- Teamwork

AFFILIATIONS

SPE – Soc. of Petroleum Engineers
Student Member
MIT Global Classroom
Participant, 2025

ROCÉLIO DA SILVA

Offshore & Upstream Engineering · SPE Member · Luanda, Angola

PROFILE

3rd-year Petroleum Engineering student at ISPTEC with a strong drive for offshore operations and technical software development for the oil & gas industry. ISPTEC team leader at PetroChamp, SPE Student Chapter Membership Chairperson and MIT Global Classroom participant (2025). Builds Python tools for reservoir engineering (Z-factor, EOR selection). Fluent in English (TOEFL 99) and committed to technical excellence in emerging markets.

PROFESSIONAL EXPERIENCE

Membership Chairperson – SPE Student Chapter

ISPTEC / Society of Petroleum Engineers 2026 – Present

- Leads member recruitment, engagement and retention.
- Coordinates technical seminars and fosters industry-academia networking.

Secretary of Academic Affairs

AEISPTEC – ISPTEC Student Association 2025

- Coordinated academic events and departmental activities.
- Managed student communications and academic documentation.
- Acted as liaison between academic leadership and the student body.

KEY PROJECTS

Community Solar Feasibility Study – MIT-ISPTEC (2025)

MIT Global Classroom · Angola Energy Access Initiative

- Optimal site selection via GIS analysis and energy demand modelling.
- Presented findings to international stakeholders and ISPTEC leadership.
- Direct impact on energy access strategy for underserved communities across Angola.

Z-Factor & EOR Decision Tool – Python (2024–2025)

Software Engineering · ISPTEC

- Python Z-factor calculator (Pitzer-Curl, Papay) for reservoir conditions.
- EOR method selection module: multi-criteria analysis (WAG, polymers, CO2 flooding).
- Interactive CLI; CSV export and Matplotlib charts.

ACHIEVEMENTS & RECOGNITION

2025 PetroChamp – ISPTEC Team Leader: Led the ISPTEC team in the PetroChamp technical competition, demonstrating academic excellence and leadership under pressure.

2025 Host & Speaker – ISPTEC Geosciences Academic Week; coordinated multi-national speakers.

2025 MIT Global Classroom – Community Solar Energy Access; study presented to international collaborators.

2022 TOEFL 99/120 – Advanced English proficiency enabling SPE and MIT international collaborations.

CAREER OBJECTIVES

Seeking a position in offshore or upstream petroleum engineering where I can combine reservoir engineering knowledge, technical software development in Python and team leadership to contribute to efficient, sustainable operations in Angola and sub-Saharan Africa.
